

editor.restore

Remove an existing Textbox.io editor from the page, restoring the original element container. Content modified using Textbox.io is preserved within the restored container.

Example

editor.restore()

```
// Replace the element with id 'replaceMe'  
var editor = textboxio.replace( '#replaceMe' );  
// Remove the Textbox.io editor  
var element = editor.restore();
```

Returns

element	HTML element	The element that was previously replaced by Textbox.io. Returned element contents are updated with changes made during an editing session.
