

Demo project

In the Textbox.io for ASP.NET distribution zip file, you'll find a "demo" folder, which contains Visual Studio project that demonstrates how to integrate this product into your application. In the "examples" folder, you'll find several aspx pages that demonstrate different aspects of integrating Textbox.io. Also note the web.config file, which has the change described in [Getting started - standard deployment](#).

Use this demo project as a reference, or as a template for your own projects.
