

# Known Limitations

## Image Uploads

Textbox.io for ASP.net embeds local image in the content, then extracts them on the server. Uploading images on insertion is not supported.

See [Image uploads](#) in the Textbox.io for ASP.net documentation

See [Handling Local Images](#) in the Textbox.io documentation.

## Editor Types - Classic vs Inline

Only classic mode is supported.

See [Editor types - Classic vs Inline](#) in the Textbox.io documentation.

## ASP.net MVC

This framework has not been tested and is not officially supported.
