

Tiny Dictionaries

EditLive! comes packaged with several language-specific dictionaries. These dictionaries are used in conjunction with the EditLive! spell-checking functionality.

The `<spellCheck (Applet)>` configuration file element is used to specify which dictionary is used with a particular instance of EditLive!.

Available Dictionaries

All dictionaries are packaged in the `redistributables/editlivejava/dictionaries` directory bundled with this SDK.

Dictionary Name	Language
en_us_4_0.jar	English (US)
